TIM Datenbase Views

Before the dashboard can function properly, the appropriate views must be created. The most recent views can be found on the download server **http://download.tim-solutions.de** and must be implemented correctly. As soon as the views have been created, the TIM Tabellen structure may be used for analyses with the TIM Dashboard.

If the views are used outside of the dashboard, no result will be returned because te views are coupled with the TIM-authentification.
