ArchivationWebserviceActionHandlerV2

Description

This handler archives selected document for [Zollner](#). The handler writes a variable named "archivation_succeed" with the value **true** for success and **false** for errors.

Fundamentally, all of the parameters from the handler parameter are configurable and can revert back to the typical process variable syntax (`${VARIABLEN_NAME}`)!

Action Class

```
com.dooris.bpm.actionhandler.ArchivationWebserviceActionHandlerV2
```

Event Type

any

Action Name

any

Mandatory Fields

none

Parameter

username_prefix

Denotes the user domain requesting authorization.

Default - ZOLLNER_DE\
Process variable - possible

username

Here, the username with which the web service authenticates is entered.

Default - none
Process variable - possible

password

Denotes the password of the user requesting authentication.

Default - none
Process variable - possible

documentsVariable

denotes the [Process_variable](#) in which the document IDs to be passed are contained (see also [show_documents_to_flag](#))

Default - none
Process variable - possible

zeichnr

Default - Process instance ID
Process variable - possible

zeichnrEN

Default - zeichnr
Process variable - no

zeichbeschr

Default - Process variable nr
Process variable - possible

zeichbeschrEN

Default - zeichbeschr
Process variable - no

zeichtyp

Default - Process variable change_type
Process variable - possible

docclassname

Default - Change message
Process variable - possible

docstate

Default - VALID
Process variable - possible

hierachyname

Default - Production
Process variable - possible

zartikel

Default - zarticlenr_new
Process variable - possible

zartikelrecursion

Default - bet_mat_sap_new
Process variable - possible

url

Default – loom.properties secureex_url
Process variable – possible

qNamespaceUri

Default – loom.properties secureex_qnamespace_uri
Process variable – possible

qLocalPart

Default – loom.properties secureex_qlocalpart
Process variable – possible

domain

Default – loom.properties secureex_domain
Process variable – possible

archivationsucceed

Is true for success and false for an error
Default – archivation_succeed
Process variable – possible

companyCodeLabel

Default – COMPANYCODE
Process variable – possible

companyCodeValue

Default – none
Process variable – possible

productSapNo

Default - PRODUCT_SAP_NR_SHORT
Process variable - possible
