AssignTasksByVariableHandler

Description

This uses a process variable, which contains an expression (i.e. user(max.mustermann), group(Sales)), to assign all of the tasks from a given node to a user or group. This is set on Node-Enter. If the process variable does not contain a valid expression, a default assignment may be configured.

Action Class

```
com.dooris.bpm.assign.AssignTasksByVariableHandler
```

Event Type

Node-Enter

Action Name

any

Mandatory Fields

-

Parameter

processVariable

Here, a process variable (`${processvariable}`) or a direct user/group can be given, i.e.:
user(max.mustermann) / group(Sales)

defaultAssigne

Here, a default process variable (`${processvariable}`) or a direct user/group can be given, which is used in case the "processvariable" is zero. i.e.: user(max.mustermann) / group(Sales)

Example

Symboleigenschaften - Aktivität

The screenshot displays the 'Edit Event' dialog box in a BPMN editor. The dialog has the following fields:

- Ereignistyp: Node Leave
- Aktionsname: AssignTasksByVariableHandler
- Aktionsklasse: ooris.bpm.assign.AssignTasksByVariableHandler
- Mandatory Fields: (empty)
- Parameter: processVariable=user (\$mitarbeiter_vertrieb);

The background shows a task list table with columns 'Aufgabenname' and 'Rollenzuweisung'. The 'Automatisierung' menu item is highlighted in the left sidebar.
