InheritAttachedDocumentsHandler

Description

This handler adopts documents from a potential super-process (i.e. main process) into the current sub-process. Here, all documents from the main process will be transferred, as long as they do not already exist in the sub-process. If the flag is set to upwards ("true"), the documents will be taken from the current sub-process and transferred to the main process.

Action Class

```
com.dooris.bpm.actionhandler.InheritAttachedDocumentsHandler
```

Event Type

any

Action Name

any

Mandatory Fields

-

Parameter

upward

Tells if the attached documents should be retrieved from a main process (false) or carried back to the main process (true). The default value if false.

Example

Eventtyp	Action Name	Action Class	Mandatory Fields	Parameter
node-leave	Inherit Attached	com.dooris.bpm.actionhandler.InheritAttachedDocumentsHandler		upward=true;
