

AdHoc task

A so-called AdHoc task can be created dynamically and is not part of the original process course. Such a task can be created e.g. when an employee finds during the execution of a task, that an additional (not already provided) step is necessary to end the task. For this step, the employee creates an AdHoc task, which must be done in addition to the scheduled tasks.

Such a task can be created in the [Properties](#) of the task.

Whether the task is an AdHoc task can be seen in the task list. If the symbol in this column is colored-in, it is a task that was created dynamically. If the symbol is not colored, it is a common task.

Activities | **Tasks** | My Tasks | My finished Tasks

Task	Actor	Group							
Adhoc - SS-ID generator	John Doe	-							
Create offer	John Doe	Issuer							
SS-ID generator	John Doe	-							
Total pricing	Jane Doe	TIM Wiki Deployer
