

Emptying the Cache in Google Chrome

1. Click on the symbol to access the properties menu – the three bars in the upper-right corner.

2. Select **More tools**, followed by **Clear browsing data**.

3. Select **The beginning of time** from the drop-down list.

4. Select **Cookies and other site and plugin data** as well as **Cached images and files** from the list.

5. Confirm by clicking "clear browser data**".

The screenshot shows the Google Chrome settings page with the 'Einstellungen - Browserdaten' tab selected. A modal dialog box titled 'Browserdaten löschen' is open, prompting the user to confirm the deletion of browser data. The 'Gesamter Zeitraum' (Entire range) is selected. Under 'Was möchten Sie löschen?' (What do you want to delete?), several options are checked: 'Cookies und andere Website- und Plug-in-Daten' (Cookies and other website and plugin data), 'Bilder und Dateien im Cache' (Images and files in the cache), and 'Passwörter' (Passwords). Below the dialog, a note states: 'Gespeicherte Inhalteinstellungen und Suchmaschinen werden nicht gelöscht und können Ihr Browsingverhalten widerspiegeln.' (Saved content settings and search engines will not be deleted and can reflect your browsing behavior). At the bottom of the dialog are 'Weitere Informationen' (More information), 'Browserdaten löschen' (Delete browser data), and 'Abbrechen' (Cancel) buttons.
