

## New Features

### ✓ [TNR-2865] - Servlet for downloading all documents

Attachments are not attached to mails, if a defined file size is exceeded. Then a link will be created so that all attachments can be downloaded password-protected. This helps to spare full mail boxes.

### ✓ [TNR-2989] - Access rules for expansion stages of TIM SmartForm Suite

With the system-role "smart form-designer" and / or "smart form-architect" the different stages of development of TSS can be controlled.

### ✓ [TNR-3055] - Integrate TIM PDF Converter licence

A new PDF Converter has been integrated, which is responsible for merging and converting files to PDF.

### ✓ [TNR-3010] - Improve Wordtemplatehandler so that not all variables are resolved when searching the docx-template

Through a new parameter, now the process variables can be resolved only, before searching for the template name.

### ✓ [TNR-3011] - Show notes of the main process in related softlinks

In Softlink processes the notes of the main process can now be displayed.

## Bugs

✓ [TNR-1752] - Notes are not displayed correctly in reports

✓ [TNR-2978] - Highlighting in process models is not located correctly

✓ [TNR-2992] - Mandarin cannot be chosen in Administration Client

✓ [TNR-3039] - Smartforms with DOM Repeater cannot be saved anymore
