

New Features

- ✓ [TNR-2626] - **Adhoc tasks: Assign button should also save changes**
All changes are saved if the assign button of an Adhoc task was clicked.
- ✓ [TNR-3158] - **Milestone calculation now works if manually entered milestone is later than automatically calculated milestone**
- ✓ [TNR-3407] - **ToDo Client getMyOpenTaskInstances improved performance**
This Webservice was refactored and now delivers fast results even for a large amount of data.
- ✓ [TNR-3453] - **Open a processinstance in popup via Intancename**
Instances can now be opened with `?instance=<instancename>`
- ✓ [TNR-3454] - **new easy to use process signal timer method with transaction handling**
A new timer which calls a signal after a certain period of time.
- ✓ [TNR-3481] - **add method + timezone information of soap calls to get parameter**
The Timezone was included to SOAP calls in order to see in which region the call was made.
- ✓ [TNR-946] - **Translation of search result tab**
Some translations were missing in the search result tab.
- ✓ [TNR-1613] - **iCal-Handler fullTime**
The iCal-ActionHandler was extended so that it can also create full-day events.
- ✓ [TNR-3382] - **MergePDFDocumentsHandler should also convert PowerPoint Files**
MergePDFDocumentsHandler is now able to convert Powerpoint files to PDF.
- ✓ [TNR-3232] - **Columns 'task' and 'group' should be added in effort report and in effort tab**
- ✓ [TNR-3347] - **Link to TaskInstance in MailNode**
Mail nodes can now link to TaskInstances. Thus, an escalation mail can include a link directly to the task.
- ✓ [TNR-3307] - **MailReminderHandler for Nodes**
The MailReminderHandler is now able to send one reminder per activity and not one per task.
- ✓ [TNR-3274] - **Wordtemplatehandler should replace variables without data fields**
The WordTemplateHandler can resolve variables without specific data fields. Thus, variables can be used in the header and footer.
- ✓ [TNR-3218] - **New option to send the next task mail only if the assignee did not finish the last task**
Users are able to choose if they want to receive task mails for tasks where the preceding task was also done by them.
- ✓ [TNR-3262] - **Do not show a due date if there was no duration**
If an activity has no duration, no due date will be shown.

Improvements/Bugfixes

- ✓ [TNR-2654] - “Modeler” and “Model version” are not displayed correctly in our repository when Signavio BPMN is imported
- ✓ [TNR-2851] - PM instance lists is not refreshed after finishing last task
- ✓ [TNR-2978] - Highlighting in process model is not correctly located
- ✓ [TNR-3110] - SignalSoftlinksByWaitstateIdentifier tries to signal the root token if the waitState is within a fork gateway
- ✓ [TNR-3144] - BWOD/SAML SSO login: user language is not loaded correctly for sum and average in dashboard
- ✓ [TNR-3203] - realStart of nodes does not interpret timezone addition (+2)
- ✓ [TNR-3242] - Report cannot be created if request exists
- ✓ [TNR-3260] - EDIT Button in repository not correctly enabled
- ✓ [TNR-3314] - Creating user export takes 3 minutes
- ✓ [TNR-3324] - signalAllWaitStateByTimeFromVariable does not set RealEnd
- ✓ [TNR-3341] - PI Report has no fallback if requested in other languages than “de” or “en”
- ✓ [TNR-3346] - Translations for “Spalte” and “Anzeige” in column configuration missing
- ✓ [TNR-3367] - Mails cannot be sent if the ErrorMail-Group has empty Memberships
- ✓ [TNR-3372] - Files of the virtual folder are always sent as a download
- ✓ [TNR-3373] - Deleting Documents before instancestart by webservice throws exception
- ✓ [TNR-3385] - signalProcessInstanceInWaitStateAndSetProcessVariable does not set RealEnd
- ✓ [TNR-3533] - Processvariables in the task description are not resolved in taskmails
