New Features

✅ [TNR-3472] - **Main and Subprocesses are not synchronized on publishing**
If a main process is published, the latest published subprocess will be linked.

✅ [TNR-1737] - **Report popup should not be shown after archiving**
If an instance is archived, no popup will be shown anymore.

✅ [TNR-2809] - **ToDo client - finished tasks: Column process cannot be viewed**
The column "Process" is now available in the tab "My finished tasks".

✅ [TNR-3187] - **Make archived Instances active again**
Archived instances can be activated again.

✅ [TNR-3188] - **Actionhandler for Excel to CSV Parsing**
The new Excel2CSVHandler is able to convert Excel files to CSV.

✅ [TNR-3194] - **Prohibit upload and deletion of documents for specific tasks [SSCTMT-182-186], [GS-1001]**
tim.properties can restrict uploading and deleting documents for specific tasks.

✅ [TNR-3439] - **general flag to disable swimlane assignment of actors after task completion**
This flag defines if a user is assigned automatically to a swimlane after finishing a task.

✅ [TNR-3443] - **show documents and blogarticle count in subprocesses from mainprocess**
Zeigt die Anzahl an Dokumenten und Notizen von Hauptprozessen in Subprozessen an.

✅ [TNR-3444] - **flag to show only main processes in myStartedInstances**
Durch diese Einstellung werden unter "Meine Instanzen" nur noch Hauptprozesse angzeigt.

✅ [TNR-3451] - **option to filter searchresults by current user groups**
Durch diese Einstellung kann definiert werden, welche Instanzen in Abhängigkeit von den User-Gruppen über die Suche gefunden werden.

✅ [TNR-3457] - **Allow multiple ATTACH commands in mails**
Mail-Nodes interpretieren nun auch mehrere ATTACH-Befehle.

✅ [TNR-3463] - **show all timer columns in admin client**
Der Tab "Timer" im Adminclient zeigt nun standardmäßig alle Spalten an.

✅ [TNR-3563] - **signal waitstate method for processmanagers**
Waitstates können nun im Processmanager-Client getriggert werden.

✅ [TNR-3586] - **Variableshelper can now resolve variables in variables**
Prozessvariablen lassen sich nun auch innerhalb von Prozessvariablen verwenden und werden aufgelöst.

Improvements/Bugfixes

✅ [TNR-332] - **Processes can be deployed without owner/starter**

✅ [TNR-507] - **Taskmail is sent even if user is absent**

✅ [TNR-1348] - **Hauptprozess ist im Deadlock wenn Subprozess archiviert wird**

✅ [TNR-2647] - **HTML Smartform is not editable with TSS enabled**

✅ [TNR-3026] - **MergePDFHandler cannot merge documents with special chars in filename**

✅ [TNR-3259] - **When a translation exists, a process can't be used as a softlink anymore**

✅ [TNR-3461] - **Process with too many XORs can't be deployed with CPM activated**

✅ [TNR-3464] - **loading tasks or instances via generic entity manager leads to write DB access**

✅ [TNR-3484] - **MailNode mails after BoundaryEscalation do net get "variable-replaced" if process has translations**

✅ [TNR-3523] - **overWriteExisting does not overwrite PDF in mergePDFDocumentsHandler if Variable is used in mergeName**

✅ [TNR-3562] - **Columns cannot be changed anymore [GS-1023]**

✅ [TNR-3565] - **Absence can create infinite loop of assignment**

✅ [TNR-3583] - **When a process has been started by CreateProcessInstanceFromFolderByXML the FileArchivationHandler doesn't read out the process variables in the first script node**

✅ [TNR-3594] - **Open tasks get forwarded to substitute, also when "Hand over existing tasks?" is set to NO [TMT-317]**

✅ [TNR-3633] - **Repository does not show loading process**

✅ [TNR-3646] - **getTasksOfMyGroups does not use TranslationManager**

✅ [TNR-3660] - **Umlaute are destroyed after uploading via Resrouces tab**

✅ [TNR-3666] - **performpastreminders sends reminder mails also for tasks, where the process has been archived already**

✅ [TNR-3668] - **Non terminating end deactivates token signalling**

✅ [TNR-3707] - **signalByMailReply does not search in currentClient**
