Explanation

In the enterprise edition of TIM - Task In Motion, the customer is allowed to create so called clients. Clients can represent various customers, subcontractors or test-systems.

Creation of clients

There is only one user in the system for the creation of new clients who will be unlocked and delivered as soon as you have purchased the enterprise edition of TIM - Task In Motion.

How to register with the user is explained here [hier](#)

As soon as you are registered, you can do a right-click on **root** and then click on the button "Create client". In the following window you can enter your desired client name. The system then creates the clients with the standard users and you can log in to the new client.

How to log in to the new client is explained here [hier](#).
