requirement

Introduction

T!M - Task !n Motion is a Java-based application which runs (at the moment exclusively) in JBoss and which requires a databasis as storage medium.

> On request you will receive the installation package at T!M - Task !n Motion (support@tim-solutions.de)
>
> This documentation will only focus on an installation in Windows. This documentation might otherwise also be used for a Linux-based operating system if there is enough necessary expertise to make the adaption.

Hardware requirements

You will find the the most up-to-date requirements on this page.

Content of the installation package

The installation package is distributed in ZIP-format and therefore has to be unziped. The folders and files depicted on this picture are momentarily combined in one single ZIP-file.

FirefoxPortable
This is a portable Firefox browser which is supposed to be used to check for issues of compatibility and to test functions of Javascript in a more efficient way.

JBoss
This is the specific JBoss which has been set up to run T!M - Task !n Motion. Alternatively, if available, an already existing server may be used for this purpose.

MySQL
This is a freely available data base system. Please refer to this page to get more detailed information on which exact version is being supported at the moment.

OOP
An Openoffice Headless Server (without the user interface!) which is necessary to convert Word-files into PDFs.

Java-JDK
Die aktuell ausgelieferte Java Version, die benötigt wird, um den JBoss Server laufen lassen zu können, da dieser auf Java basiert.

NPP (Notepad++)
Ein sehr umfangreicher Texteditor, der einen Eintrag in das Kontextmenü von Windows hinzufügt.

Die Schritte im Überblick

1. Installation von Java JDK

2. Installation und Konfiguration von MySQL als Datenbank

3. Installation und Konfiguration von JBoss

4. Installation und Konfiguration von T!M - Task !n Motion
Setzt einen laufenden MySQL-Server voraus.

5. Installation von T!M - Documentconverter
Wird benötigt um Wordtemplates in PDF's zu Konvertieren. Wie man diesen einsetzt, kann man hier
nachlesen.

6. Installation des Dashboard
Das Dashboard kann von Prozessmanagern eingesetzt werden um Datenauswertungen zu fahren.
