Upload documents

It is possible to attach documents, with e.g. process-relevant information, to a process instance. These documents can be uploaded and then downloaded and viewed by those who are involved in the process. All types of documents can be uploaded, e.g. PDF, Word, pictures, text files. The documents can be deleted as well. The window where the documents are managed can be reached via the context menu and the appropriate menu item.

Name	Bemerkung	Erstellungszeit	Ersteller	Content-Typ	Speicherort
allgemeines.pdf	Hier steht ein PDF	Dokument hochladen	Max Meixmaix	application/pdf	TIM-DB
Beispiel.zip	Hier ist ein Dokument hochgeladen.	13.08.2013 08:36	Max Meixmaix	application/zip	TIM-DB
SF.html	HTML Dokument	13.08.2013 08:48	Max Meixmaix	text/html	TIM-DB

Element	Description
1	The entire name of the uploaded document is shown here.
2	During the upload of the document (see Hochladen) a note to this document can be indicated. It appears in this column.
3	With this button a window opens where a file can be uploaded. (see Hochladen.)
4	The time when the document was uploaded is displayed here.
5	The user, who had upload the document, is displayed in this column.
6	The Content-Type/MIME-Type of the document is displayed in this column. It shows which kind of file it is.
7	The memory location of the document is displayed in this column. It either can be the TIM database or an own one with own DMS.

Context menu

Different actions can be performed via the context menu of a document:

Menu item	Description
Open document	The document can be downloaded or opened directly with this menu item.
Delete document	With this menu item the document can be deleted from the instance.
Characteristics	Detailed characteristics of the document can be viewed here and the description can be also changed afterwards. See Eigenschaften .

DMS

Schema

It is possible to attach new documents to the process instance with this window.

Array	Description
File	Here you can select a file from your own computer by using the file selection dialog.
Description	In this array you can put in any description, which is assigned to the document.
DMS	= D ocument m anagement- S ystem. Either the TIM system and its database can be selected here or an own external DMS can be used.
Schema	Only necessary when an external DMS is used. The schema must be chosen then, in which the document shall be stored.

Indexing

The indexing is only relevant when an external DMS is used. Key words can be given to a document, which are stored in the database and facilitate the search of a specific document.
