Options for Starting Instances

TIM has various ways to a start a process instance. This can be done directly via TIM, via webform, via timer, via webservice directly from TIM or via actionhandler.

- Actionhandler: StartProcessInstanceActionHandler
- Actionhandler: Via an XML-file within the folder
- Webform
- Via Timer with CSV-file in file system
- Via Timer with any file in file system
- Via webservice
- Example of starting via process definitions names
