

Options for instance starts

T!M offers many options for a process instance start. This can be done via T!M, via webform, via timer or via webservice directly from T!M or via actionhandler.

- [Actionhandler: StartProcessInstanceActionHandler](#)
- [Actionhandler: Start of an instance via a XML-file within the folder](#)
- [Webform](#)
- [Via Timer with CSV-file in file system](#)
- [Via Timer with any file in file system](#)
- [Example for start via webservice](#)
