

Fix Me! This page is not fully translated, yet. Please help completing the translation.
(remove this paragraph once the translation is finished) Login Mask

Generally, the mask for the login/registration consists of the following components/fields:

- **Login:** Here, you have three options to specify your registration data: see [Types of registration](#)
- **Password:** Here, the assigned password has to be entered
- **Client:** Here, you can choose between the different clients you want to log in to. A successful registration with each of the clients depends on the rights which have been assigned to a particular user.

The screenshot shows the login interface for TIM (Task In Motion). The title is "Anmeldung" (Login). The logo "TIM task In motion" is in the top right. There are three input fields: "Login:" with the text "tim4you/john.doe", "Password:" with masked characters, and "Client:" with a dropdown menu showing "ToDo - Client". A "Login" button is at the bottom right. Below the form, the text "TIM - Task In Motion v4.0" is visible.

Via a click on the client dropdown you get to the different options:

- [ToDo-Client](#)
- [ToDo-Client 1G](#)
- [Processmanager-Client 4G](#)
- [Processmanager-Client](#)
- [Administration](#)

To get to the [TIM Dashboard](#) for analyses the URL <http://COMPANY-SERVER/dashboard/> has to be entered into the navigation bar of your browser.
