

Login Screen

Generally, the mask for the login/registration consists of the following components/fields:

- **Login:** Here, there are three ways to enter your registration data: see [Types of registration](#)
- **Password:** Here, the assigned password is entered
- **Client:** Here, the user can choose between the different clients that are available for log-in. A successful registration for specific clients depends on the rights that have been assigned to a particular user.

The screenshot shows the login interface for the TIM BPM Suite. It includes a title 'Login TIM BPM Suite' and the TIM logo. The form has three main input areas: a 'Login:' field containing 'wiki/alex.allbekannt', a 'Passwort:' field with masked characters, and a 'Client:' dropdown menu currently set to 'ToDo Client'. A 'Login' button is positioned at the bottom right of the form.

By clicking on the client drop-down menu, the available options appear:

- [ToDo-Client](#)
- [ToDo-Client 1G](#)
- [Processmanager-Client 4G](#)
- [Processmanager-Client](#)
- [Administration](#)

To get to the [TIM Dashboard](#) for analyses, the URL <http://COMPANY-SERVER/dashboard/> has to be entered into the navigation bar of your browser.
