General Information

Since TIM is based on Java, the software can be operated almost on any Java-based system. Of course, all these systems can be used as virtual hosts.

Software Requirements

Current System Requirements can be found under
https://doc.tim-solutions.de/display/DOC/System+Requirements

Recommendation Server

Since TIM is scaled based upon the size of processes, the following indication is meant to provide only a rough guideline.

Component	TIM - Engine	Database
CPU	1 Core @ min. 2.4 Ghz	1 Core @ min. 2.4 Ghz
RAM	2GB of free RAM	2GB RAM
Harddisk	10GB	10GB
Software Version	Windows Server 2016 R2 / Unix Debian Stretch	Oracle 12c or MS-SQL Server 2016

MS-SQL Server 2012/2014 is supported but Dashboard does not support multiple clients in dashboard.
