

General Information

Since TIM - Task In Motion is based on Java, the software can be operated almost on any system which is Java-based. The following list provides an overview of examples:

- Windows Server 2008
- Windows Server 2012
- All Unix Systems (Debian, Ubuntu, SuSE, ...)
- Mac OSX
- and so on...

Of course, all these systems can be used as virtual hosts.

Software requirements

- Java JDK version 7 ([go to the installation instructions](#))
- data base (e.g., MySQL version 5.1.x, Oracle 11, MS-SQL 2012) ([go to the installation instructions](#))
- JBoss 5.1.0 GA, EAP 6.0.1, AS 7 ([go to the installation instructions](#))

Hardware requirements

Since TIM - Task In Motion is actually using scales between the logged in user and the size of processes the following table is meant to provide only a rough guideline. The system can be adapted very easily and according to requirements.

	T!M - Engine	Data base
50 Users	2 Cores / 2GB Ram	2 Cores / 4GB Ram
200 Users	2 Cores / 8GB Ram	2 Cores / 4GB Ram
500 Users	4 Cores / 8GB Ram	2 Cores / 8GB Ram
800 Users	4 Cores / 12GB Ram	4 Cores / 8GB Ram

Clients

- Any browser can be used as a client without having to meet any specific requirements, e.g. Java JRE or Adobe Flash Player
- Internet/Intranet-capable client
- Mozilla Firefox from version 2.0.0.20
- Google Chrome from version 39.0
- Microsoft Internet Explorer from version 9
