## Roundcube - an alternative to Mail Dumbster

One disadvantage of [Mail Dumbster](#) is its rendering of e-mails which does not emulate an e-mail client. For instance, formatting and attachments of the original e-mail will not be included. In contrast to this, outgoing TIM e-mails can be viewed via the Roundcube Client in the same formatted version as if they would be sent to a real addressee.

### Configuring Roundcube

Please enter **mail.taskinmotion.de** as Smtp host in the [client profile](#). Please contact the team of TIM Support to receive further details related to the setup of an user account and a password for Smtp.

### Login to Roundcube

The following window for login will be displays after entering **mail.taskinmotion.de** into the navigation bar of a browser:

The data for the login procedure are identical to those saved in the client profile.

### The client

All e-mails which had been sent by the system will be shown here. This procedure ensures that these e-mails will be forwarded to the client instead directly to individual addressees.

< 100% 200px>	
Element	Description
1	This entry shows all received e-mails
2	An e-mail will be displayed in this area if it has been selected in element 1.

By double clicking on an item in this list a selected e-mail will be enlarged while at the same time the list disappears:

< 100% 200px>	
---------------	--

Element	Discription
1	The subject of the selected e-mail will be shown in this field (in this example the noun "subject" is used to name the actual subject of the e-mail!)
2	The sender of an e-mail is identified here.
3	The actual addressee is identified in this field. At this stage the addressee will not receive this e-mail yet!
4	The date of delivery is indicated by this entry.
5	The complete text of the e-mail is displayed in this field.
6	If some <a href="#">files</a> had been attached to the e-mail, then these will be depicted in this area. These attached files are also available for downloading.
