

## getLongUserAndTimeStamp

With the integration of the function, a click on the textarea the editor, the date as well as the current time are captured and added to the comment

```
<textarea name="REPLACE ME" id="REPLACE ME"
inputmethod="getLongUserAndTimeStamp"></textarea>
```

This HTML snippet has to be inserted into the smartform. The name and ID can be chosen freely. As the inputmethod the function “**getLongUserAndTimeStamp**” has to be used.

The result should look like this:

24.06.2014 11:18 - Mustermann, Max:  
Bitte überarbeiten
