Report Buttons

It is possible to include a button in the smartform which allows to create report with a click. Therefor the following code has to be included and adjusted in the smartform.

```
<button type="button"
onbuttonclick="generateReport([{showActivitiesTable:'true',showActivitiesNotes:'true',reportType:'PIReport',showInstanceNotes:'true',showSmartForm:'true',showProcessGraphic:'true',reportFormat:'pdf',reportLanguage:'de'}])">Report Button</button>
```

The attribute "onbuttonclick" defines which functions should be executed by the handler.

- showActivitiesTable: Specifies whether the report should have a task table or not.
- showActivitiesNotes: Specifies whether the task's notes belong in the report or not.
- reportType: PIReport the instancereport will always be created.
- showInstanceNotes: Should the report include the instancenotes?
- showSmartForm: Should a listing of the processvariables be included?
- showProcessGraphic: Is a processgraphic neeeded in the process?
- reportFormat: Should the report be created in a *pdf-* or a *xls* format.
- reportLanguage: Reportlanguage. So far English and German are possible.
