Tasks

A task is the subunit of an activity. Each activity is made up of one or more tasks. See also [Structure of a process](#). An activity is completed only, when all contained tasks have been completed.

A task is a correct work step that must be executed by an employee before the next process step can be started.

The [task assignment](#) determines, who has to do the task.

Tasks have a name, a description, if required a direct [Assignment](#), and can contain [Links](#).
