

createReminderForEveryNodeForProcessdefinitionInProcent

Description

This timer creates an [escalation](#) for each node instance each process instance of the given process definition.

Timer Name

any name

Webservice Name

EscalationManager

Webservice Methode

createReminderForEveryNodeForProcessdefinitionInProcent

Parameter

Process definition

Name of the process definition

remindInPercentBeforeEnd

Percentage to be escalated before the end of the node. Example: If the parameter is 40, it will escalate when 60% of the processing time for this node is reached. (Node has duration 10h (1000) then it is escalated at 40 after 6h).

assignee

Who should be notified of the escalation. (see [MailReminderHandler](#))

limit

Number of escalations to be created at each call.

IMPORTANT!

If this number is too large possibly no escalations will be created.

Example

 Properties X

*Properties	<input type="text"/>
Timer name	<input type="text" value="CreateReminder_FinancialStatement"/>
Webservice name	<input type="text" value="EscalationManager"/>
Webservice methode	<input type="text" value="createReminderForEveryNodeForProcessdefinitionInProcent"/>
Parameter	<input type="text" value="8D Problem Solving,20,group(ProjectManager),10"/>
Acting user	<input type="text" value="sys.timer, (sys.timer)"/>
Starting time	<input type="text"/>
Time to start	<input type="text" value="10s"/>
Intervall	<input type="text" value="10m"/>
Max. recursion	<input type="text" value="-1"/>
Act. recursion	<input type="text" value="0"/>
Status	<input type="text"/>
Last execution	<input type="text"/>
<input type="button" value="Save"/>
