

createReminderForEveryNodeForProcessdefinitionInProcent

Description

This timer creates an [escalation](#) for each node instance each process instance of the given process definition.

Timer Name

any name

Webservice Name

```
EscalationManager
```

Webservice Methode

```
createReminderForEveryNodeForProcessdefinitionInProcent
```

Parameter

Process definition

Name of the process definition

remindInPercentBeforeEnd

Determines the time of the escalation for an activity as a percent. e.g. If the parameter is set to 40, after 60% of the given time is elapsed, it will escalate. (An activity with a duration of ten hours (100%) will escalate, after six hours (60%) have passed.

assignee

Determines the user, which will be notified in case of an escalation (see [MailReminderHandler](#))

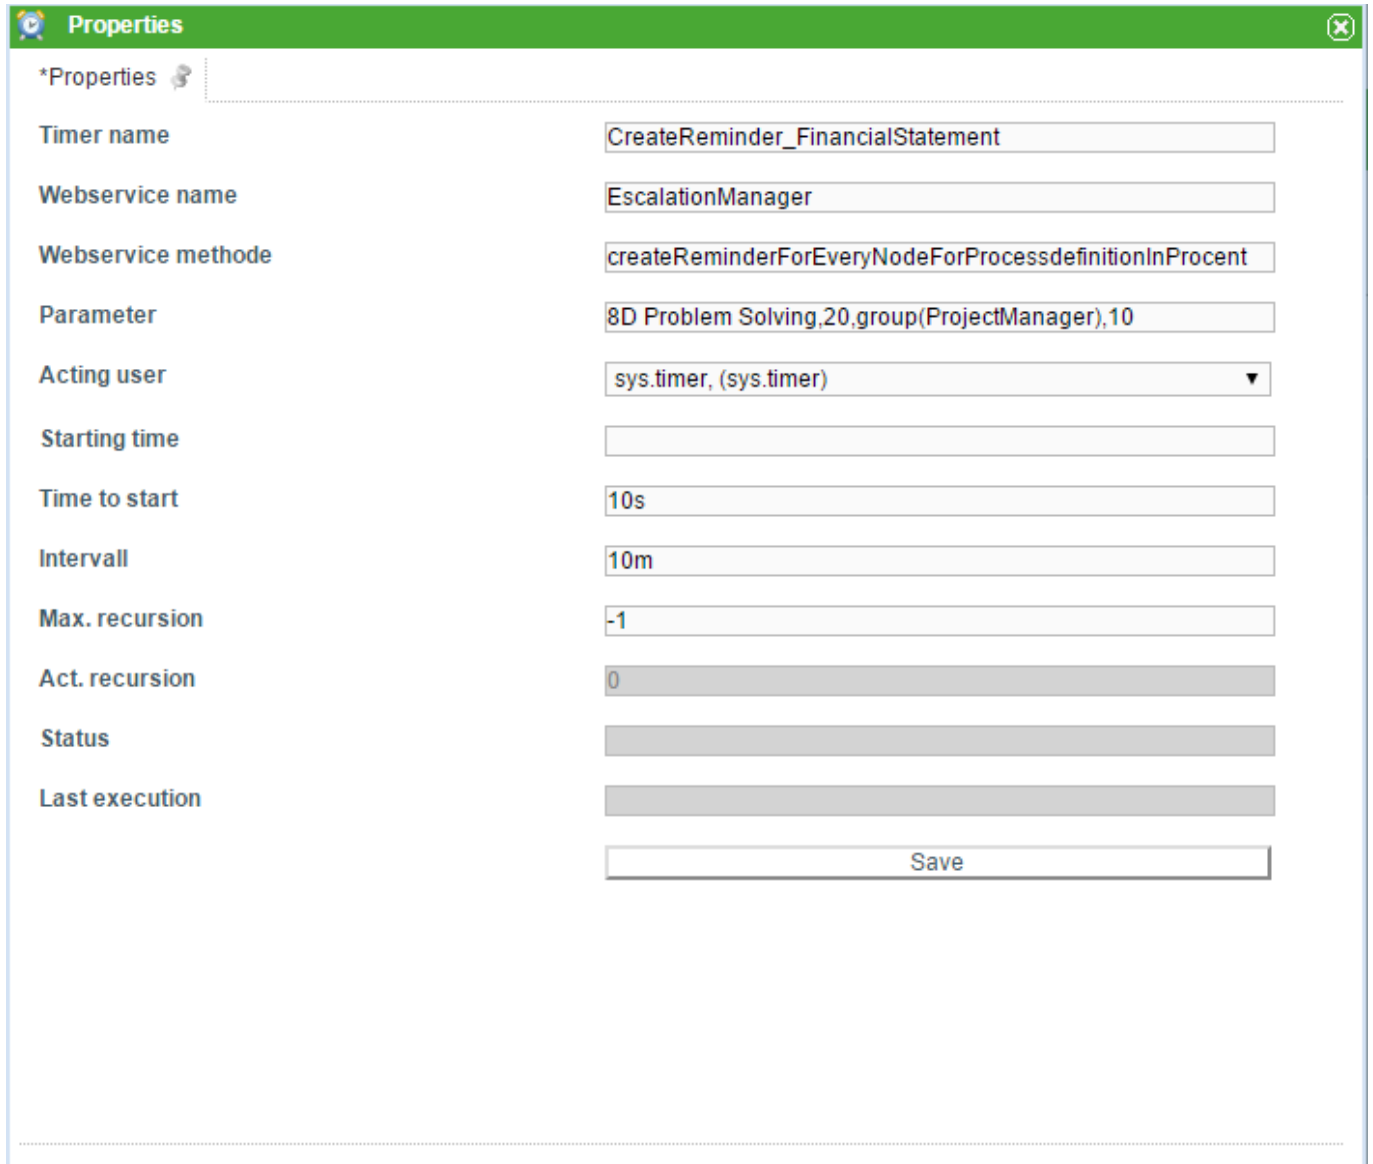

limit

Number of escalations to be created at each call.

IMPORTANT!

If this number is too large possibly no escalations will be created.

Example

The screenshot shows a 'Properties' dialog box with a green header bar. The dialog contains the following fields and values:
