

You get to the user settings via a click on a user within a group. In the opened window you can chose the user which shall be in this group.

The screenshot shows the 'Properties' dialog box. It has a green header bar with the title 'Properties'. Below it, there are two input fields: 'User' containing 'Doe, Jane (jane.doe)' and 'ID' containing '6259'. At the bottom right is a 'Save' button. To the left of the 'User' field is a dropdown arrow icon, indicating a dropdown menu is available.

In this dropdown you can find all users which are arranged for this client profile.

The screenshot shows the same 'Properties' dialog as above, but the 'User' dropdown is now open, displaying a list of users. The list includes: 'please select...', 'admin, (admin)', 'Alfs, Martin (Alfs)', 'Doe, Jane (jane.doe)', 'Doe, John (john.doe)' (which is highlighted with a blue selection bar), 'guest, (guest)', 'Manager, Prozess (pm)', and 'Mustermann, Max (max.mus)'. The 'Doe, John (john.doe)' option is currently selected.

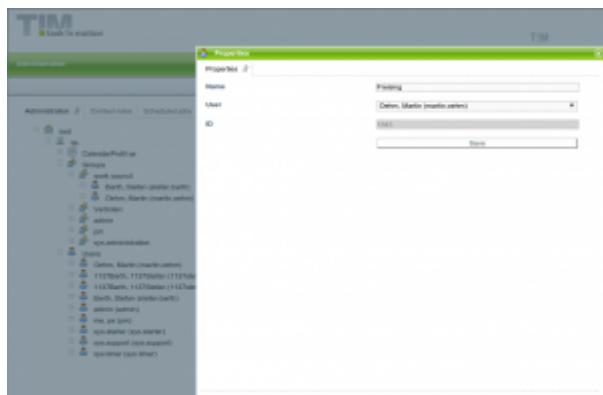

User settings for Group Affiliation

Create new Memberships

The screenshot shows the TIM Administration interface. The top navigation bar has tabs for 'Administration', 'Context-roles', 'Scheduled jobs', and 'Mail queue'. Below the navigation is a tree view of the system structure. Under 'Groups', the 'work council' group is expanded, showing its members: 'Barth, S.' and 'Oehm, Martin (martin.oehm)'. A green button labeled 'Add member' is positioned next to the 'work council' node. Other groups listed include 'Verboten', 'admin', 'pm', and 'sys.administration'. At the bottom of the tree is a 'Users' node.

In order to add an User to a group you have to select the Group by right clicking on it. After that select "Add" to create a new Membership.

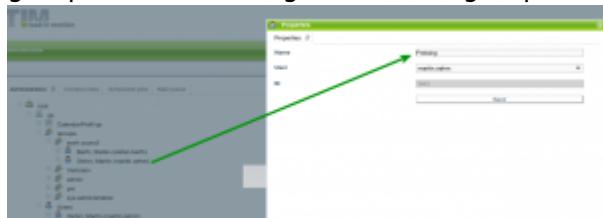

Edit Memberships

To edit an existing Membership, click on any Membership which you want to edit.

Set a Name for a Membership

To set a Name for a membership might be helpful, in order to use the extended assignment of a group. It will not assign the whole group, but just one member of it. Details can be seen [here](#)
