

In der Smartform folgendes DIV einfügen.

```
<div initMethod="preparePrint" style="cursor:pointer;display:block"><img
src='/loom-portal/resrc/img/png/printer.png' /></div>
```

In der [custom.js](#) muss [jQuery](#) eingebunden sein. Falls dies nicht der Fall ist beim Laden der Smartform
 jq= (this.form.ownerDocument.defaultView!=null) ? this.form.ownerDocument.defaultView.jQuery :
 this.form.ownerDocument.parentWindow.jQuery; ausführen.

Es muss nur noch die preparePrint Funktion in die custom.js eingefügt werden.

```
gadget.functions.preparePrint = function () {
  function adjustMaskSize() {
    var fullSizeDiv = document.getElementById("printFullSize");
    fullSizeDiv.style.width = '0';
    fullSizeDiv.style.height = '0';
    fullSizeDiv.style.height = document.body.scrollHeight + 'px';
    fullSizeDiv.style.width = document.body.scrollWidth + 'px';
  }
  var getParentWindow = function (obj) {
    var d = obj && obj.ownerDocument ? obj.ownerDocument : doc;
    return d.parentWindow || d.defaultView;
  };
  this.innerHTML="<img src='/loom-portal/resrc/img/png/printer.png' />";
  this.style.cursor="pointer";

  this.onclick=function()
  {
    this.style.display="none";
    var html = '<html><head><title>Print view</title><script>\n' +
adjustMaskSize.toString() + '\n</script>';
    jq=getParentWindow(this).jQuery;
    // adding styles
    jq('link[href$=".css"]').each(function (idx, el) {
      // Util.log("found link: " + el.href);
      html += jq(el).clone().wrap('<div>').parent().html();
    });

    html += '</head><body class="printVersion" onload="adjustMaskSize()"
onresize="adjustMaskSize()">' +
'<div id="fullSize">&nbsp;</div><div>';

    jq('form').each(function() {
      html +=
jq(this).clone().wrap('<div>').parent().html().replace('id="local_zone"',
'class="local_zone"');
    });

    html += '</div></body></html>';

    var popupWindow = window.open('', '_blank',
```

```
'menubar=no,addressbar=no,location=no,resizable=yes,scrollbars=yes,status=no' );
popupWindow.document.open();
popupWindow.document.write(html);
popupWindow.document.close();
popupWindow.print();

this.style.display="block";

}
};
```
