

## Requirements

- ✓ [TNR-3896] - **EAP 7.1 Support**  
EAP JBoss 7.1 is required for this update

## Deprecated software

- ✓ Java JDK 1.6 and JDK 1.7 is now deprecated and will no longer be supported.
- 

## Story

- ✓ [TNR-4942] - **Oracle 12.2 R2 Support**  
Oracle 12.2 (R2) is now official supported.
- ✓ [TNR-2373] - **new role concept with matrix**  
A new role concept was implemented, which allows users only to interact with instances as participant
- ✓ [TNR-2690] - **RulesMatrix Refactoring**  
In the rulesmatrix lines can now be moved, filters can be used and much more.
- ✓ [TNR-4042] - **Extended filter functionality for tasks- and instances tab**  
New filters were implemented which can be stored and create filter over multiple columns.
- ✓ [TNR-4422] - **Users can define individual columns by which tabs are sorted**  
Users are now able to set and store their sorting options for clients.
- ✓ [TNR-4421] - **Extended Filter: Filter for index field which contain a date**  
If a Timestamp is used for processvariables it can be configured via custom.js in order to enable correct sorting of index fields in clients.
- ✓ [TNR-4148] - **Refactor Search in Clients**  
In order to improve the performance of the search it was refactored and e.g. a min length of 3 signs has to be searched for.
- ✓ [TNR-4061] - **Add the capability to handle 10 more index fields**  
It' now possible to handle 20 index fields instead of 10.
- ✓ [TNR-3739] - **Add autocomplete fields for selecting users**  
For user dropdowns its now possible to use the new autocomplete dropdown in order to select a user easier of a large list of users.
- ✓ [TNR-3640] - **MergePDFDocumentsHandler should also convert txt and csv files**  
MergePDFHandler can now also convert txt/csv files to pdf if needed.

✓ [TNR-3185] - **Folders in Document Tab**

In document tab you can now create folder structure.

✓ [TNR-3219] - **Automatically delete browser cache before login**

Browsercache can be forced to be ignored via tim.properties

✓ [TNR-4583] - **Deleting processinstances after a given time**

A new timer was implemented which can delete instances after a given time. Be aware that all information to this instance will be irretrievably deleted.

✓ [TNR-4375] - **Open Documents directly in Browser if Browser supports it (documents folder)**

Documents can now be displayed directly in browser (e.g. PDF)

✓ [TNR-4491][TNR-4784] - **New columns in delayedmail**

New columns id and instancename were added to mailqueue.

✓ [TNR-4668] - **Confirm grabbing of tasks if task is assigned to somebody else**

User will get notification if he tries to grab task which is already assigned to another user.

✓ [TNR-4669] - **Converting to PDF right after upload of files**

A new property was added which enables the conversion of office files to pdf on upload.

✓ [TNR-4672] - **Recipients of notes mails can be chosen**

If a notification for notes is created, its now possible to select who will get informed

✓ [TNR-4746] - **timer popup is now prefilled with sys.timer**

The execution user of new timers is now sys.timer and locked.

✓ [TNR-4810] - **actionhandler to create viewer contextroles via variable or direct notation**

A new actionhandler was added which can create viewer contextroles in order to view instances for users.

✓ [TNR-4227] - **Encoding of user import and export can now be selected**

The encoding while import or export users via administration client can now be selected in order to ensure correct usage of special chars. Encodings can be set via tim.properties. Also there is now a limit for max rows in csv file.

✓ [TNR-4359] - **do not refresh smartform on saveSmartFormAndSetToDone**

Now the smartform is not called again, if task is set to done.

✓ [TNR-4517][TNR-4530] - **make upload size of files configurable**

New properties were added which limit the maximal upload size of files in documents and resource folder.

✓ [TNR-4613] - **New Timer signalNodesFromProcessVariablesWithLimit**

Yet another signalTimer which signales nodes/waitstates when the provided date is reached.

✓ [TNR-4657] - **Tasks must not be grabbed if the Smartform is locked by another user**

If a smartform is locked by an user it cannot be grabbed by another user another.

✔ [TNR-3042] - **Optimize text and subject of the error mail**

Errormails now have more information about the failed mail (id, recipient, instancename and subject)

✔ [TNR-4660][TNR-4809] - **Refactor resource folder in admin client**

A new resource folder was implemented. In order to migrate the old resource folder has to be migrated to new resource folder. Please download old folder and upload it again.

✔ [TNR-4477] - **improve timer signalProcessInstanceInWaitStateAndSetProcessVariable to enable time values**

It is now possible to run the timer with a time value in order to signal at 10.00 a.m

✔ [TNR-4602] - **SAML without credential cache to avoid session stickyness on loadbalancers**

Session stickyness is not necessary any more for loadbalancing.

✔ [TNR-4496] - **Smartform locking will not be created via finished tasks**

Now finished tasks will not create smartform locks.

✔ [TNR-4901] - **rework updateEscalationStatus for performance improvements**

UpdateEscalationStatus got a refactoring in order to work faster on systems. For this rework the attribute „inTime“ on processinstance was removed. Please check Dashboardwidgets if they use it.

✔ [TNR-3212] - **create Roles via database initialization**

Systemroles are now created with client creation

✔ [TNR-3045][TNR-3894][TNR-4750][TNR-4755][TNR-4872][TNR-4919] - **GUI improvements**

Some changes in frontend for better client handling.

✔ [TNR-4702][TNR-4786][TNR-4849] - **Logging improvements**

AliveCheckServlets now print their details also to log.

✔ [TNR-3766] - **LOOM\_DBQUERY querystring to small for complex queries**

QueryString was increased to 4000 characters in order to enable complex queries.

✔ [TNR-2129] - **Licensefile handling**

Servers will need a valid license to start. Please speak to your Project Manager to get details.

## Bugfixes

✔ [TNR-3576] - **Process Repository created Task is not assigned to Swimlane**

✔ [TNR-3807] - **InstanceArchivationhandler does not work in Subprocesses**

✔ [TNR-3879] - **„Process“ column in tab „search results“ cannot be sorted**

✔ [TNR-4062] - **SignalLinkedSuperProcessHandler should take care about active client**

✔ [TNR-4140] - **RulesMatrix values sometimes swap columns**

✔ [TNR-4162] - **Scroll bar missing in Resource tab**

✔ [TNR-4418] - **Search results cannot be exported to XLS**

✔ [TNR-4465] - **Exception can't be triggered twice on same task**

- ✓ [TNR-4497] - **Deployment not possible due cached expression-validation**
- ✓ [TNR-4675] - **ADD\_BCC is not resolved in mailnodes**
- ✓ [TNR-4692] - **Files are not replaced on upload in resource tab if name matches**
- ✓ [TNR-4774] - **defaultRepresentative does not get active tasks from user with absence**
- ✓ [TNR-4929] - **Office365 errors do not fit in errormessage column**

## Known Bugs

[TNR-4736] - SAML signatures do not work for EAP 7.1

[TNR-4649] - Process variables are not replaced in task descriptions if process has been restored and published in repository

[TNR-4291] - Mailnodes in Repository cannot be extended with ATTACH REGEX
