Story

✔️ [TNR-5025] - A new timer archiveExpiredProcessInstances was added
The new timer archives all instances of a given process definition after a given time and sets a specified process variable
The timer works in combination with the existing timer deleteExpiredProcessInstances and all instances that were archived with the new archiveExpiredProcessInstances timer will be deleted instantly
Sub-processes will be detected automatically and archived accordingly

✔️ [TNR-5134] - 'search-for-processvariables' property added which can be set to true/false.
This property will enable/disable slotsearch for process variables and is enabled on default (known behavior). The new property does not affect detailed smartform search.

✔️ [TNR-5195] - A new Migration page reachable on 'loom-portal/migrate.htm' can be used to migrate from older versions
Resources, Timerusers and context roles from older versions to v5.10+ can migrated on this page. Only super users are able to access this page

✔️ [TNR-4870] - The recipient address in the mail queue can be changed
Unsent mails can now be changed in mailqueue. If the mail is already sent a new queued mail is generated on which the recipient can be changed.

✔️ [TNR-5038] - groups participating role gets deleted when the user grabs task
If a user of a group grabs a task, all other group members are removed from participating context role and cannot open the task anymore.

✔️ [TNR-4810] - actionhandler to create viewer contextroles via variable or direct notation
A new Actionhandler was implemented which can create a contextrole which allows a user to view the instance.

✔️ [TNR-4837] - Oportunity to create/ quick access multiple filters for each tab
Filters can now be stored and recovered by users for easier changing pre defined filters.

Improvements

✔️ [TNR-5106] - StartSoftlinksFromProcessVariablesHandler is now able to start softlinks in child transactions to handle large numbers of started instances
✔️ [TNR-5200] - IDGenerationActionHandler is now compatible to JBoss 7.2 (and 7.1)
✔️ [TNR-5131] - ExtendedIDGenerator generates an ID and saves it to a variable and is independent of the process definition
✔️ [TNR-5108] - Functionality of interactions in resources tab was extended substantially
✔️ [TNR-5081] - Auto-Unzip was disabled and it is now possible to unzip resources manually.
✔️ [TNR-5219] - It's now possible to add additional fields to requests of HTTPRestHandler
✔️ [TNR-4960] - The export format of tables was changed from XLS to XLSX to support more rows in the output file and columns of XLSX exports can now be filtered by default
✔️ [TNR-4773] - Queries in Administation client now also allow insert and update operations instead of being limited to select

✅ [TNR-5133] - Process model highlighting adjusted and supports more modellers

✅ [TNR-5274] - wildcards for selecting processDefinitions can be used in deleteExpiredProcessInstances. Two new tim.properties to specify minimum holding time of instances of timers archiveExpiredProcessInstances and deleteExpiredProcessInstances.

✅ [TNR-5130] - Actionhandlers that contain blanks as pre- or suffix are now trimmed on process deployment

✅ [TNR-5212] - Users that only have the role resource-manager can login to Administration client without a required administrator role

✅ [TNR-5189] - Performance of migration Webservices in ContextRoleManager improved

✅ [TNR-5187] - Owners now can save Smartforms without having to be in a corresponding group

✅ [TNR-5014][TNR-5066] - LDAP Sync logging improved and now works for groups with more than 1500 users

Bugfixes

✅ [TNR-4987] - Process models in Internet Explorer are now displayed correctly and support zoom functionality. Process models that were deployed prior to this realease need to be re-deployed for this extension.

✅ [TNR-5150] - ReturnRegexHandler sets indices of process variables correctly again

✅ [TNR-5141] - Default mail texts can be set again per activity and processdefinition

✅ [TNR-5243] - 'search-wildcard' The char '%' doesn't work as a wildcard anymore, when changing the search-wildcard property in tim.properties

✅ [TNR-5239] - Autocomplete for adding recipients to blog articles fixed

✅ [TNR-5233] - The timer deleteExpiredProcessInstances now deletes sub-processes as intended

✅ [TNR-5206] - HttpRestHandler now correctly supports sending JSON via PUT

✅ [TNR-5205] - SOAP Endpoint supports UID parameters again

✅ [TNR-5199] - Resources can be removed again when using JBoss EAP 7.2.2

✅ [TNR-5197] - ProcessVariableManagerImpl.merge can be called by all participants of the affected process instance and is not limited to process-owner anymore

✅ [TNR-5139] - Users that belong to a large number of groups (~1000) are able to load task- and instances lists

✅ [TNR-5021] - Reassignments to representatives due to absences are now correctly shown in instance reports and assignment history

✅ [TNR-5132] - Tasks aren't shown in tasklist anymore, if process end is caused within parallel gateway

✅ [TNR-4381] - Selecting a process definition will not create a tmpFolder on selection anymore (only when process instance popup is opened)

✅ [TNR-4145] - Hovering an activity in Business Activity Monitoring client does not cause an empty page anymore and shows the desired information

✅ [TNR-2955] - Choosing a process in the absences popup is now translated correctly

✅ [TNR-5201] - Custom GET parameters don't get removed anymore, when Login is required

✅ [TNR-5240] - Owner and Starter expression limited to varchar(255) to avoid exceeding columns in some databases

✅ [TNR-5261] - CreateProcessInstanceFromFolderByXML now interprets the content of all xml files correctly

✅ [TNR-5263] - ldap account is not locked anymore after TSS Smartform is opened

✅ [TNR-5210] - if usernames only have digits as username they are now correctly shown in useradministration tree

✅ [TNR-5050] - Autocomplete in filters does not work for columns with Integer values

Deprecated Features

✅ [TNR-5248] - removed deprecated VoidGenericOutputServlet (.void)

Known Issues

✅ [TNR-5255] - Running TIM on case sensitive databases is not possible
