

Story

- ✔ [TNR-4422] - Users can define individual columns by which tabs are sorted
User can now set and store column and sorting for different tabs in clients.
- ✔ [TNR-4421] - Extended Filter: Filter for index field which contain a date
User can now filter for dates in index fields. In order to enable this feature the custom.js has to contain a 'gadget.setValue(„smartFormIndex<number>-dateField“, true)'
- ✔ [TNR-4375] - Open PDF Document directly in Browser (documents folder)
PDF can now be displayed in the client and has not to be downloaded anymore.
- ✔ [TNR-4166] - Do not show config passwords in plain text
All timers, actionshandlers and datasources (standalone xml) can now be used with encrypted user and passwords.
- ✔ [TNR-4042] - Extended filter functionality for tasks- and instances tab
The new frontend (New Application has to be deployed) can encrypt and validate passwords and hashes which can be used instead of cleartext passwords.
