New Features

✔️ [TNR-3185] - **Folders in Document Tab**
Users can now create a folder hierarchy in document tab.

✔️ [TNR-3639] **new signal method signalProcessInstanceByIdAndTransitionName (no node name needed)**
This Method can signal processinstance without submitting nodenames.

✔️ [TNR-3495] **create System Users (autom.) via admin client context menu**
When a new client is created some system users will also be added automatically (sys.timer, sys.support, sys.starter)

✔️ [TNR-3191] **Extended escalation model**
A new escalationmodel was implemented and can define different escalation levels for different processes. Feature can be found in Process Repository Client.

✔️ [TNR-2290] **Admin Client: Show all users in a list**
A new Tab was created in Administration Client which shows all users in a table view in order to optimize administration of users.

✔️ [TNR-3405] **User Increment value from Table**
MySQL, MSSQL and Oracle used different ways to increment primary keys. This was changed and alle database types are now using saming incrementing type.

✔️ [TNR-3308] **Implementation: Automatically delete browser cache before login- default no-cache=false**
This propertie can be set in tim.properties. If set to true the browser cache will be ignored if users logs in. Userfull for updates or changing project sources.

Improvements

✔️ [TNR-3726] **release all smartform locks on client (frontend) leave (also on reload)**
Locks on smartforms will now be released if user just closes browser and does not press save or close the smartform.

✔️ [TNR-3766] **DB Cell „queryString" in loom_dbquery is too small (255)**
Queries can no contain up to 4000 signs.

✔️ [TNR-3752] **User import should be able to handle at least 100 users in 50 groups**
The user import in administration client was improved and can not handle more users and groups. A refactoring is outstanding.

✔️ [TNR-3390] **sendAllDelayed Mails fetches (not sends) also blocked DelayedMails**
The email timer will not fetch every unsent mail anymore. Only mails which are not blocked and not sent will be fetched and tried to send.

Bugs

✔ [TNR-3727] section locking mustn't disable forms marked with disableTimInit class
✔ [TNR-3671] all specialchars can be used as pass except |
✔ [TNR-3793] Process is not signaled with AdHoc Tasks in Loop
