

## Adjusted Help PDF

A Help PDF can be called at various points, e.g. via the question mark symbol in the [ToDo Client](#). This PDF provides short instructions for finishing tasks. It can be adjusted by placing corresponding PDFs in the “custom” folder of the client.

```
.....standalone\tim.ear\loom-portal.war\custom\
```

The PDFs' names for the different languages have to be named as follows:

```
'3steps2done_' + 'LANGUAGE-' + 'SPECIFICATION' + '.pdf'
```

For the placeholder then an abbreviation for the language has to be put, e.g. “de” for German, “en” for English and so on..

example:

British English: “3steps2done\_en-GB.pdf”

American English: “3steps2done\_en-US.pdf”

German: “3steps2done\_de-DE.pdf”
