

User Profile - Password

The screenshot shows a web application window titled "User" with a green header. Below the header is a tabbed interface with tabs for "Properties", "Profile", "Absence", "Absence rules", and "*Password". The "*Password" tab is selected. The form contains three input fields: "Old password", "New password", and "Retype new password". Each field is filled with dots. Below the "Retype new password" field is a "Change password" button.

A user password can be changed either by the user personally or by an administrator. To change the password, first enter the old password followed by the new password. To confirm the change, type the new password again in the 'confirm new password' field to ensure that no mistake has occurred.

The old password is not necessary to make changes if the user has **administrator** rights!
